SUMMARY

Polyglot software engineer with 2+ years of experience building web products from interface to database, currently developing software across lines of business for MSIG USA. Previously shipped enterprise Angular platforms for Amdocs and Schaeffler, and builds full-stack products for small businesses through Nexora Studio.

EXPERIENCE

Software Engineer — Hare and Turtle AI Solutions Sep 2026 – Present

Client: MSIG USA (insurance) | Pune

- Polyglot developer for MSIG USA, a large insurance group, building software across multiple lines of business (LOBs), from the interface to the services behind it.

Software Engineer — Rabbit and Tortoise Technology Solutions Jul 2024 – Aug 2026

Clients: Amdocs and Schaeffler | Pune / Bengaluru

- Built and maintained enterprise Angular applications with TypeScript, RxJS, Signals, SCSS and REST APIs, with reusable components, AG Grid data screens and clear loading, empty and error states, delivered in Agile sprints alongside backend engineers.

Studioforce (Amdocs) · Angular, TypeScript, SignalR, REST APIs

- Built frontend features for an AI workflow platform where users build and run agent workflows on a drag-and-drop canvas, with node connections, panning and agent skill configuration.
- Delivered dashboards for agents, blueprints, predictions and generated workflows, with execution controls and live status updates over SignalR.

AI-Assisted SW (Schaeffler) · Angular 19, VS Code Extension API, Chokidar, REST APIs

- Developed the Angular web UI for an AI-assisted Gradle error analysis platform and contributed to its VS Code extension.
- Built project-wise, per-project and admin dashboards; sent build-error and changed-file context to backend services and displayed AI recommendations with filtering and pagination.

MBD – Model-Based Design (Schaeffler) · Angular 19, Signals, AG Grid, Angular Material

- Developed Angular modules for a requirement-to-Simulink-model generation platform in an automotive embedded software pipeline, with Excel and Polarion import workflows.
- Rendered large requirement datasets in AG Grid and implemented Level 3–4 requirement selection and agent dispatch through RIA, LLRGA and FLA.

INDEPENDENT WORK

- **Nexora Studio** — studio site and admin portal with case studies. Next.js, Neon, Drizzle, Cloudflare Workers
- **Cattle Feed Billing** — billing, stock, dues and Marathi WhatsApp bills. Next.js, PostgreSQL, Vercel
- **Shree Balaji Paints** — catalogue, WhatsApp quotations, paint calculator. Next.js, Drizzle, Neon
- **Cricket Live** (open source) — real-time scores over Server-Sent Events. React, ASP.NET Core, Redis
- **SQL Automation Next** (open source) — multi-database schema and SQL workspace. React, .NET, YARP, Docker
